WHAT'S NEXT

a story in every stitch

Automatic Presser Foot Lift

The Automatic Presser Foot Lift puts this important feature right at your fingertips for easy access and better control of your work. Other great convenience features include Start/Stop Button, Automatic Thread Cutter, Speed Control Slider and Locking Stitch Button.

All the Essentials - And More!

You won't find a better equipped machine in its class. 240 stitches including 11 buttonholes ensure you have a stitch for every project. One-Step Needle Plate Conversion makes changing between straight and zig zag needle plates a snap, and 15 included feet means you have just the right accessory for a wide range of sewing tasks.

Color LCD with Backlight

The full-color 4.4 x 2.5" LCD touchscreen allows you to combine stitches, change stitch width and length, even access specialized sewing help in the Sewing Applications section. A new and improved Graphic User Interface means editing icons and machine navigation are even easier.

AcuFeed Flex™ Fabric Feeding System

Janome's exclusive AcuFeed Flex fabric feeding system moves your project together under the needle with perfect precision. Enjoy this great feature on quilts, thick home décor projects, even garments and accessories. The system is fully detachable and easy to remove when not in use.

Ready for Quilting!

With a spacious bed of 8.25 x 13" and vertical clearance of 4.7", this machine offers the room you need to tackle your quilting tasks. From AcuFeed to ensure even feeding of your quilt from the top and the bottom, to quilt-specific features like three free motion quilting feet, you have the tools and space for effortless quilting.

Stitch Composer™ Stitch Creation Software

Create your own custom stitches on your PC with Janome's unique Stitch Composer software. Design totally original stitches or bring in graphics to trace, creating stitches up to 9mm wide. And when you are finished, import the stitches using the machine's USB port. Easy!

SEW THE LOOK

Making dreams come to life, bringing pleasure to those you love, and creating memories that last – these are the things that keep us coming back to our sewing machines again and again. You need a machine that is ready to sew when you are, and ready to tackle challenging fabrics and projects. Even those made out of fabrics only appreciated by the little girl in all of us.

This adorable mermaid costume – made out of a range of difficult fabrics – is a breeze with the Skyline S7. Easily stitch the lining fabric to the organza skirt using AcuFeed Flex, which makes matching the layers and keeping the fabrics from slipping easy. You'll really notice the dependable power of this machine when sewing a metallic fringe bodice! This adorable costume proves that no project, no material, and no imagination is too big for the Skyline S7.

Piece, Quilt, Appliqué, and More

The Skyline S7 includes so many tools to make your quilting easier. You'll love the range and agility of the appliqué stitches – fully customizable blanket, appliqué and zig zag stitches; as well as the perfect cornering application. For straight line accents on fabric layers, as well as ditch quilting, you'll wonder how you ever lived without AcuFeed Flex. Even piecing has specialized functions built into the machine, like memorized piecing for perfect points, great for diamonds! The machine also includes a full range of feet for piecing, appliqué, and free motion quilting.

Big, Bold Stitches

Decorative stitches, including alphabets, can be sized up to 9mm in width. This means your stitches are bolder, brighter, and more distinct. Make unique ribbon for trims, create custom tags for clothing, or add sophisticated accents to any project. And with 91 different needle positions, their intricacy is unmatched.
